Catalog # CD2-H5255

#### Synonym

CD72,Lyb-2,Lyb2

#### Source

Human CD72, Mouse IgG2a Fc Tag(CD2-H5255) is expressed from human 293 cells (HEK293). It contains AA Arg 117 - Asp 359 (Accession # <u>P21855-1</u>). Predicted N-terminus: Arg 117

### **Molecular Characterization**

CD72(Arg 117 - Asp 359) mFc(Glu 98 - Lys 330) P21855-1 P01863

This protein carries a mouse IgG2a Fc tag at the C-terminus.

The protein has a calculated MW of 55.0 kDa. The protein migrates as 60-66 kDa under reducing (R) condition (SDS-PAGE) due to glycosylation.

### Endotoxin

Less than 0.1 EU per  $\mu g$  by the LAL method.

## Purity

>90% as determined by SDS-PAGE.

#### Formulation

Lyophilized from  $0.22 \ \mu m$  filtered solution in 50 mM Tris, 100 mM Glycine, 25 mM Arginine, 150 mM NaCl, pH7.5 with trehalose as protectant.

Contact us for customized product form or formulation.

### Reconstitution

Please see Certificate of Analysis for specific instructions.

For best performance, we strongly recommend you to follow the reconstitution protocol provided in the CoA.

### Storage

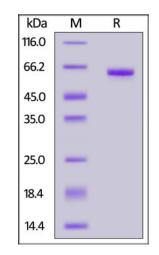

For long term storage, the product should be stored at lyophilized state at -20°C or lower.

Please avoid repeated freeze-thaw cycles.

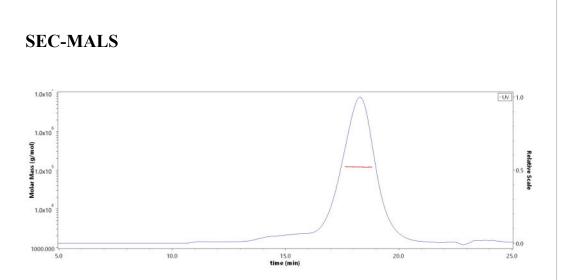

This product is stable after storage at:

- -20°C to -70°C for 12 months in lyophilized state;
- $70^{\circ}$ C for 3 months under sterile conditions after reconstitution.

# **SDS-PAGE**

Human CD72, Mouse IgG2a Fc Tag on SDS-PAGE under reducing (R) condition. The gel was stained with Coomassie Blue. The purity of the protein is greater than 90%.

The purity of Human CD72, Mouse IgG2a Fc Tag (Cat. No. CD2-H5255) is more than 85% and the molecular weight of this protein is around 108-132 kDa verified by SEC-MALS. <u>Report</u>

### Background

B-cell differentiation antigen CD72 is also known as Lyb-2. CD72 contains one C-type lectin domain. CD72 is a protein active in the immune system of animals. CD72 consists of two identical halves, each of about 39-43 kD, and is a C-type lectin. Its primarily locus of expression is B-cells, where it appears to mediate aspects of B-cell - T-cell interaction. CD72 plays a role in B-cell proliferation and differentiation. CD72 is a ligand for CD5.
